| (21) Appl. No.: 10/845,292 | (57) ABSTRACT |
| (22) Filed: May 13, 2004 | The present invention relates to a method of obtaining protection against, simultaneously, a specific allergen and a by-stander allergen. The method comprises the administration of a compound comprising an allergen binding domain and a Fc domain, wherein the bystander allergen is unrelated to the allergen bound by the allergen binding domain. |
