(54) Title: INDUCTION OF MUCOSAL TOLERANCE TO ANTIGENS

(57) Abstract: The present invention relates to the induction of tolerance to antigens, by mucosal, preferably oral delivery of the antigen in combination with an immunomodulating compound producing micro-organism. More specifically, the invention relates to the induction of Foxp3⁺ and/or IL-10 and/or TGF-β producing regulatory T-cells, capable of suppressing undesired immune responses toward an antigen, by oral delivery of said antigen in combination with an immunosuppressing cytokine secreting micro-organism.
